**NOW Branch-Chain Amino Acids (120**

**g)**

**Net Weight 400**

Branch-Chain Amino Acid - BCAA - 120g of L-leucine, L-isoleucine, and L-valine. These amino acids are essential for muscle protein synthesis and energy production. They are found in meat, fish, and dairy products. BCAA supplementation can help reduce muscle fatigue and improve recovery after exercise.

**QNT AAKG 4000 (100 g)**

**Net Weight 100**

AAKG 4000 is a combination of L-glutamine and L-alanine. L-glutamine is an essential amino acid that helps with muscle recovery and immune system support. L-alanine is a non-essential amino acid that is converted to L-glutamate in the liver, which can then be transported to the muscles. AAKG supplementation can help improve muscle recovery and reduce fatigue.

**QNT AMINO ENDURANCE (350**

**g)**

**Net Weight 900**

Amino Endurance 350g contains a blend of amino acids including L-leucine, L-isoleucine, L-valine, L-glutamine, and L-alanine. This blend is designed to support muscle endurance and recovery during intense physical activity. The amino acids help reduce muscle breakdown and promote muscle protein synthesis.

**Steel Power BCAA 8000 Pink (300**

**g)**

**Net Weight 1000**

Steel Power BCAA 8000 Pink contains 300g of branched-chain amino acids (leucine, isoleucine, and valine) and 700g of other amino acids. The pink flavor is a popular choice for athletes. The BCAA portion helps with muscle recovery and energy production.
